

A photograph of St Alban's church at night. The church is illuminated with vibrant, multi-colored light projections. The tower on the left features vertical patterns of blue and green light. The main body of the church has large sections of red, blue, and cyan light. The sky is dark, and some trees are visible in the background.

**From 27 May to 15 June,
see St Alban's as you've
never seen before...**

**Full programme and costs
available on our website**
